

Wave is engaged in car washing and cleaning services in the UAE. We provide high quality car washing and cleaning services based on simple fundamental of clean, green and lean.

CLEAN

Our cleaning services include experienced staff with exceptional quality standards, environment friendly products and patented material that protect your car with every wash.

GREEN

We consume less than a pint of water per service with our Biodegradable products. Thereby ensuring your car also contributes towards our only Green Planet.

LEAN

Our cost is lean on your pocket keeping the highest quality standards in mind for both you and your car.

No more stopping your day. No more sitting at the car wash. WAVE COMES TO YOU wherever you are at-

- Residential Complexes and Apartments
- Office Complexes and Spaces
- Shopping Malls and Supermarkets
- Parking Lots

SERVICES

Interior cleaning

We clean the vehicles dashboard, vents, centre console, cup holder area, seats, doors, and carpets etc. We also use special vacuum attachments to get between seats and hard to reach areas. We then protect all interior surfaces with aerospace protectant. We can even treat headliners to remove stubborn stains that are often neglected by other services.

Exterior car washing

We provide exterior car washing service with our team of seasoned workers, equipped with a patented cloth that uses advanced fibre to clean your vehicle without scratching your car surface.

WHY US?

We aim to convert a larger percentage of people away from machine car washes, which damages the car's finish. We use the biodegradable car wash products, which upon contact with the car surface emulsifies the dirt whilst creating a protective coat between the dirt and the bodywork. This effect softens the dirt very quickly and lifts it away from the vehicle allowing removal with a high grade micro fibre cloth. Our product will not scratch the paint work, quite the opposite our product leaves a superb protective coating that not only creates a fantastic high gloss finish but also acts as water and dirt repellent, the more your car is cleaned with our product, the greater this protection becomes. Further, our service requires very limited quantity of water per wash.
